- a. Measured at the discharge terminal point of the compressor package in accordance with ISO 1217, Annex C; ACFM is actual cubic feet per minute at inlet conditions.
 b. The operating pressure at which the Capacity (Item 3) and Electrical Consumption (Item 11) were measured

NOTES:

- for this data sheet. c. Maximum pressure attainable at full flow, usually the unload pressure setting for load/no load control or the
- maximum pressure attainable before capacity control begins. May require additional power.
 d. Total package input power at other than reported operating points will vary with control strategy.
 e. Tolerance is specified in ISO 1217, Annex C, as shown in table below:
